### (54) INKJET RECORDING MATERIAL AND INKJET RECORDING INK

#### (57)Abstract:

PROBLEM TO BE SOLVED: To provide an inkjet recording material, which has a photo-like high gloss, a high ink absorbency and an improved preservability, and an inkjet recording ink having its improved preservability.

SOLUTION: In the inkjet recording material formed by providing an inorganic particle-containing porous ink accepting layer on a support, the provided inkjet recording material comprises the inclusion of a hydrazine compound represented by general formula [I] on the ink accepting layer and the provided inkjet recording ink comprises the inclusion of the compound.
